# Kiewit

*"We are extremely pleased with our experience in leveraging the Power Platform for the rollout of our Project Portfolio Management solution. **We were able to leverage Microsoft Project, Power Apps and Microsoft Flow in conjunction with OnePlan to create a hybrid PPM solution** that accommodates both our Portfolio Management and Project gates processes. This provides for a seamless user experience that was previously siloed in different systems and has also **set us up for success to mature our SAFe Agile strategy.**"*

Taj Barry – Sr Analyst, CSPO  
TG Product Owner, Project Center  
Kiewit Corporation

# Lean Portfolio Management Training Outline

## Topics Covered:
